Executive Summary

Motivated Computer Science student with a strong foundation in programming and software development. Proficient in Python, Java, SQL, and web technologies including HTML, with hands-on experience in developing database-driven applications and scalable solutions. Adept at problem-solving, algorithm design, and implementing efficient coding practices. Enthusiastic about leveraging technical skills to contribute to innovative projects, optimize systems, and deliver practical software solutions in collaborative environments. Continuously learning emerging technologies and best practices in software engineering.

Education

Acharya Institute Of Technology , Diploma in Computer Science Jun 2023 – Present

- GPA: 7.8/ 10 (First 4 semesters)
- **Coursework:** Data Analytics , Computer Network , Operating System , Database Management System , Project Management System , Data Structures And Algorithms.

Technical Skills

Proficient in : HTML / CSS , SQL , Java , Python Programming.

Familiar With : Git , Networking , Typescript , Linux , JAVA , MS word , Power Point.

Projects

Python Development

- Developed and executed multiple Python programs, including data manipulation, file handling, and automation scripts, demonstrating problem-solving and algorithmic skills.

Java Programming

- Built Java-based applications as part of coursework, implementing object-oriented programming concepts such as classes, inheritance, and exception handling.

SQL And Database Management

- Designed and executed SQL queries for data retrieval, updates, and database management in academic projects, showcasing understanding of relational database concepts.

Academic Projects

- Completed various coding assignments and mini-projects in Python, Java, and SQL, applying programming logic, debugging techniques, and software development best practices.

Certifications

Python Oct 2024

- Retrieving, Processing, and Visualizing Data with Python

SQL Aug 2025

- Database Management System (RDBMS) And Microsoft Fabric SQL.

Java Aug 2025

- Getting Started With Full Stack Java Development.

AI Aug 2025

- Gen AI Powered Data Analytics Job Simulation.
